

Total control

Anytime

Anywhere

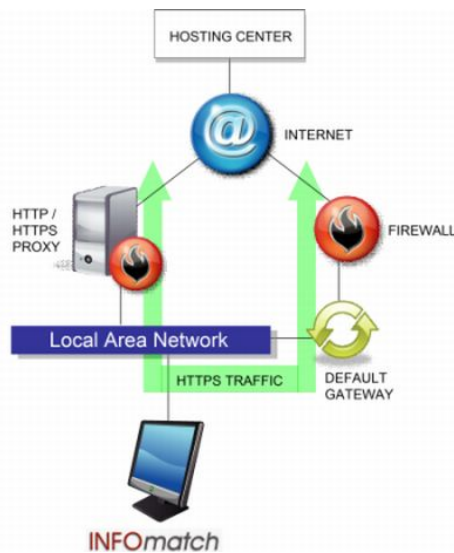

INFOmatch is available as a hosted solution, allowing you to access the system anytime, anywhere. The ASP model provides instant access to your market data inventory at any location.

You get exactly the same functionality as with a local implementation, plus browser based front-end, secure remote access and condensed set-up time.

The hosted system runs in a server-based computing environment, using Citrix technology.

With INFOmatch ASP you reduce the cost, management and security risk of local deployment computing by delivering INFOmatch virtually from the datacenter in a way that actually improves the end user experience.

Business benefits

- Drastic reduction of the Total Cost of Ownership (TCO) compared to a locally deployed INFOmatch solution
- Fast time-to-market, thanks to the shared hosting infrastructure which allows for near plug-and-play and therefore requires less set up time
- No need to invest in hardware or software and no dependence on internal IT
- Guaranteed availability of INFOmatch's latest functionality
- Secure, fully redundant infrastructure, which is monitored 24 hours per day, 7 days per week
- Scalability, e.g. instantly extend the user community, irrespective of their physical location
- Global access, allowing users to log in from any location. Access INFOmatch at the company's HQ, a foreign branch, or at home!

INFOmatch is an innovative cost & contract management system and is used by firms in the investment management, banking, energy and commodity business around the globe. It is designed by market data specialists, who have more than 20 years of international experience, including more than 480 dealing room assignments. INFOmatch is a leading reporting and analytical market data system because of easy navigation, handling and storage of historical data and tremendous reporting facilities.

The result: the new dimension of control!
