

# Being in Control of your Market Data Suppliers' Compliance Policies

More and more data vendors and exchanges prove to conduct differentiating contractual obligations, pricing policies, compliance procedures, reporting requirements and business strategy options associated with the internal and external redistribution of market data. **INFOmatch** incorporates the Compliance Rules Module to streamline all of those processes.

The Compliance Rules Module allows user firms to easily define a set of compliance rules in INFOmatch. Together with its powerful inventory management features INFOmatch's ruling intelligence results in calculations and reports which exactly reflect market data suppliers' business rules. Some compliance rules examples:

- When user has access to both product "X" and product "Y", product "Y" is free-of-charge
- 1 user accessing real-time data from NYSE or AMEX via multiple platforms (e.g. Reuters, Bloomberg and Murex) only pays for 1 access (Unit of count; MISU report)
- Automatically allocate site fee to user which has a keystation access

INFOmatch's Compliance Rules Module enables firms to be fully compliant with their data vendors' and exchanges' business rules. It prevents overcharging, underreporting and unauthorized data redistribution. As a result firms will face a significant workload reduction, when it comes to preparation for audits.

### Business benefits

- Define your own set of predefined compliance rules
- Avoid being exposed to the risk of back charges and law suits by having all your permissioning data stored correctly in a central database, including all history
- Save money by making the vendor (i.e. Reuters E-DAD) and exchange (i.e. NYSE MISU) reporting process far more efficient
- Pay for what you use: 100% match between used licenses and contractual amounts
- The interface is seamlessly integrated in INFOmatch and has a user friendly wizard
- Significant workload reduction

**INFOmatch** is an innovative cost & contract management system and is used by firms in the investment management, banking, energy and commodity business around the globe. It is designed by market data specialists, who have more than 20 years of international experience, including more than 480 dealing room assignments. INFOmatch is a leading reporting and analytical market data system because of easy navigation, handling and storage of historical data and tremendous reporting facilities.

The result: the new dimension of control!
