

Being in Control of

SMART

Permissionings

The Subscriber Management and Reporting Terminal (SMART) acts as SunGard's & Proquote's real-time market data permissioning system. It sets up and controls user IDs and entitlements for products such as MarketMap (SunGard) and Proquote Trader (backed by the London Stock Exchange). SMART records the services accessed and tracks data usage for each individual user.

INFOmatch incorporates a proprietary interface to SMART

allowing you to synchronise permissioning and usage data. The INFOmatch Entitlements interface for SunGard & Proquote pulls user data profiles and usage statistics from SMART into INFOmatch. It thereby automatically updates the changes in the user community stored in INFOmatch.

The interface also checks for price changes (taking price bands into account) and updates contracts accordingly.

GL Trade Interface - Account 796 (december 2007)

Business benefits

- The interface is seamlessly integrated in INFOmatch and has a user friendly wizard
- Pay for what you use: 100% match between used licenses and contractual amounts
- View permissioning profiles per user
- View the permissioned users per data component
- Intelligent mapping of Products, Exchanges and Users
- Track usage and cost per user, per product
- Automatically update price information in contracts
- Significant reduction of the market data manager's workload

INFOmatch is an innovative cost & contract management system and is used by firms in the investment management, banking, energy and commodity business around the globe. It is designed by market data specialists, who have more than 20 years of international experience, including more than 480 dealing room assignments. INFOmatch is a leading reporting and analytical market data system because of easy navigation, handling and storage of historical data and tremendous reporting facilities.

The result: the new dimension of control!
