

Being in Control of Thomson Reuters' OTF Community

eSpresso is Thomson Reuters' central permissioning system which controls the data authorisation of Thomson Reuters Off-Trading Floor (OTF) products, such as Reuters Wealth Manager (RWM) and Reuters Trader.

eSpresso stores the individual data accesses per user, including accesses to fee-liable data from exchanges and specialist data providers. It also tracks the data usage per user.

The **INFOmatch** Entitlements interface for Thomson Reuters eSpresso allows for pulling in user data profiles and usage statistics from eSpresso into INFOmatch. It thereby automatically updates the changes in the Thomson Reuters user community stored in INFOmatch. The INFOmatch Entitlements interface for Thomson Reuters eSpresso dramatically reduces the workload of the market data manager.

Business benefits

- The interface is seamlessly integrated in INFOmatch
- Pay for what you use: 100% match between used licenses and contractual amounts
- Fully compliant with Thomson Reuters' compliance rules
- Intelligent mapping of Products, Exchanges and Users
- View permissioning profiles per user
- View the permissioned users per data component
- Track usage per user, per product
- Intuitive synchronization wizard
- Accelerate INFOmatch's database setup
- Significant reduction of the market data manager's workload

INFOmatch is an innovative cost & contract management system and is used by firms in the investment management, banking, energy and commodity business around the globe. It is designed by market data specialists, who have more than 20 years of international experience, including more than 480 dealing room assignments. INFOmatch is a leading reporting and analytical market data system because of easy navigation, handling and storage of historical data and tremendous reporting facilities.

The result: the new dimension of control!
