

# Being in Control of Telecom Expenses

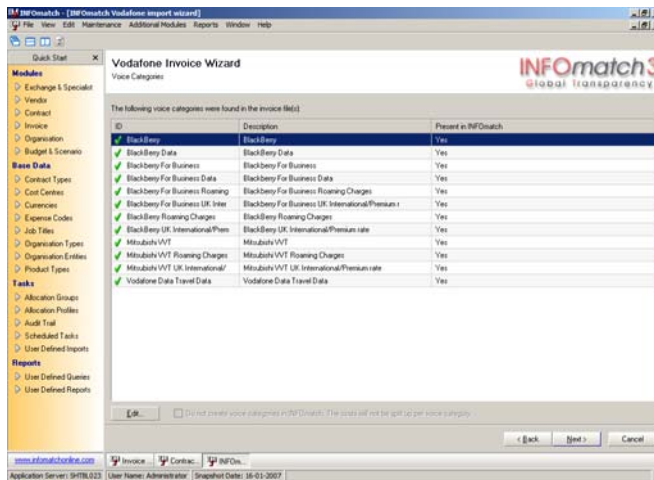

Today, Telecommunications expenses average 3.6% of a company's operating costs. Larger organizations process about 15,000 Telecom invoices per year.

The management and control of the related expenses are growing increasingly complex and is experienced being a cumbersome process.

Many enterprises aren't aware of their Telecom expenditure and feel unable to manage it professionally.

To streamline this process **INFOmatch** incorporates Telecom interfaces to all major telecom operators (including AT&T, Vodafone, and many more). These interfaces ensure you are in total control of your telecom administration.

It allows for inventory tracking including mobile phones, contract management, invoice reconciliation and cost allocations. Your telecom inventory is updated automatically, resulting in total cost transparency.

## Business benefits

- The interface is seamlessly integrated in INFOmatch and has a user friendly wizard
- Auto upload of all your electronic telephone bills
- Dramatically reduces your Telecom expenses by creating full transparency at a glance at all levels (savings up to 20%)
- Intelligent mapping of Telecom providers with their products and Users
- Includes all major Telecom providers such as Vodafone, BT One, COLT and others
- Abandon the paper workflow
- Dramatic reduction of the Telecom manager's workload.

**INFOmatch** is an innovative cost & contract management system and is used by firms in the investment management, banking, energy and commodity business around the globe. It is designed by market data specialists, who have more than 20 years of international experience, including more than 480 dealing room assignments. INFOmatch is a leading reporting and analytical market data system because of easy navigation, handling and storage of historical data and tremendous reporting facilities.

The result: the new dimension of control!
